

The 90-day checklist

Tick each line when it is done, not when it has started. Write who does each line, and the date it is due.

Organisation

[name]

Owner

[name]

Day 1

[date]

DAYS 1 TO 30

decide and set the rules

Who / due

☐ An owner is named, with time in their week to do it

☐ The leadership alignment session is held and the worksheet is filled in

☐ The main AI platform is chosen; a second only for named jobs

☐ Questions for IT or the admin are sent (week 1)

☐ The tools and connections register lists every AI tool in use, paid or not

☐ The policy is adopted, and the staff guide and the three habits have gone to everyone

☐ Three first jobs are chosen across two teams, each at level 1 or 2

☐ What to do with the time saved is decided for each team

☐ Baseline measures are taken for each job, over two weeks

☐ IT's answers are in writing (week 4), and any gaps are closed or the pilot is limited

DAYS 31 TO 60

pilot

Who / due

☐ Both teams have run Brief an Agent before the first run (week 5)

☐ Both teams have run Check What AI Writes (week 5)

☐ Each job has a written brief, a level and a check

☐ "Ask first" is set in each tool, not just typed in the brief

☐ The weekly 20-minute review happens every week, and is logged

☐ Every leader and pilot manager has shown one real task of their own at a review

☐ Each training session is in the record of AI training

DAYS 61 TO 90

scale, fix or stop

Who / due

☐ Each job has its measures against the baseline

☐ Each job has a decision: scale, fix or stop, with the reason written down

☐ Each job that scales is written down as a skill, with an owner

☐ Any level change follows five clean runs, and drops at once after a surprise

☐ The record of AI training is complete and checked

☐ The day-90 report has gone to the board

AFTER DAY 90

Who / due

☐ The monthly leadership update is in the diary for the next 12 months

☐ The register and the tools' settings are rechecked every month

☐ The next job is chosen from the picker
